

I am an XM Radio subscriber and wish to voice my opposition to the National Association of Broadcasters petition 04-160 which is trying to take away my rights and those of XM Radio to be able to listen to whatever I wish to. XM Radio provides everything that I could possibly want to listen to from news, weather, talk shows and music...24 hours a day with instant choices at my command. I travel on the highways putting on over 35,000 miles a year and want the ability to get the weather...listen to a type of music, etc. when I want. Please do not allow a jealous group of broadcasters win the right to stop free enterprise. Thank you!
